

**ALL BOILERS IN THE CURRENT WORCESTER, BOSCH GROUP GAS CONDENSING BOILER RANGE HAVE BEEN AWARDED A WHICH? BEST BUY.**

In the 2011 survey of Which? members who own a boiler, the brand reliability of Worcester gas condensing boilers was 75%; the highest score in the survey. Customer satisfaction for the Worcester brand also scored an impressive 79% - making Worcester the highest scoring brand, based on owners' satisfaction. This is why all boilers from the Worcester gas condensing range qualify to be a Best Buy.

A third of those surveyed opted for a Worcester boiler - making it the most popular brand among Which? members. In addition to receiving 23 Best Buy recommendations, the latest Which? report also looked at boiler servicing contracts, where the Worcester, Bosch Group brand came top for the fourth year running.

The Worcester i System range comprises system boilers in four heat outputs for small to medium-sized homes. They operate with a separate storage cylinder to provide hot water. They are designed to be installed in a kitchen or airing cupboard.

There are two boilers in the Worcester Greenstar Si range of combination condensing gas boilers for smaller domestic properties. They're very similar to the i Junior range, but offer slightly higher hot water heating power. The controls are basic and concealed behind the fascia. It produces hot water as you need it direct to your taps; the hot water efficiency of this model is quite good for a combi boiler.

The Greenstar CDi boilers are Worcester's top-of-the-range combination gas boilers for larger homes. Worcester claims that they operate at high efficiency in both heat and hot water mode whereas most combis only manage this when heating.

Worcester Greenstar 42CDi	Overall energy efficiency: ★★★★★ Brand reliability rating: ★★★★★	79% <b>BEST BUY</b>	The Greenstar CDi boilers are Worcester's top-of-the-range combination gas boilers for larger homes. Worcester claims that they operate at high efficiency in both heat and hot water mode whereas most combis only manage this when heating.
Worcester Greenstar 30CDi System	Overall energy efficiency: ★★★★★ Brand reliability rating: ★★★★★	79% <b>BEST BUY</b>	This boiler was missed off the initial report but will be included next week
Worcester Greenstar 30CDi Regular	Overall energy efficiency: ★★★★★ Brand reliability rating: ★★★★★	79% <b>BEST BUY</b>	There are just two boilers in the Worcester CDi Regular range of heat-only boilers which are designed to be installed in the kitchen of large family homes. They operate with a separate storage cylinder to provide hot water. They are small enough to be hidden in a kitchen cabinet.
Worcester Greenstar 40CDi Regular	Overall energy efficiency: ★★★★★ Brand reliability rating: ★★★★★	79% <b>BEST BUY</b>	
Worcester Greenstar FS 30CDi Regular	Overall energy efficiency: ★★★★★ Brand reliability rating: ★★★★★	79% <b>BEST BUY</b>	The Greenstar FS 30 and 42CDi Regular boilers are heat-only models designed for people who're replacing an old floor-standing version, or who don't have the space for a wall-mounted boiler. About the size of a slimline dishwasher, they'll fit beneath a kitchen worktop and provide heat for medium and large homes.
Worcester Greenstar FS 42CDi Regular	Overall energy efficiency: ★★★★★ Brand reliability rating: ★★★★★	79% <b>BEST BUY</b>	
Worcester Greenstar Highflow 440CDi	Overall energy efficiency: ★★★★★ Brand reliability rating: ★★★★★	79% <b>BEST BUY</b>	There's not much choice if you're looking to replace an old-style floorstanding boiler with a combination model, but the two Worcester Greenstar Highflow CDi series could be a good option if you live in a large house. There are two models that can produce enough heat and hot water to cope with larger homes.
Worcester Greenstar Highflow 550CDi	Overall energy efficiency: ★★★★★ Brand reliability rating: ★★★★★	79% <b>BEST BUY</b>
